

Minor Key Signatures (5) b

Name these minor key signatures:

Hint: work out which major key shares this key signature, then work out which note is a minor 3rd (3 semitones) lower.

Draw these minor key signatures:

Turn the scales below into **harmonic minor scales**, by writing in the correct **key signature** and the correct **accidental**. Then write the **name** of the key next to it.

Hint: you need to raise the 7th note by a semitone, by adding either a sharp sign or a natural sign in front of it.
